

# BODY CONTROL SYSTEM DTC INDEX

## NOTE:

- After confirming the MID displays, perform the troubleshooting according to the DTC index.

| MID displays | Honda code | DTC   | MIL blinks | DTC name  | Refer to page |
|--------------|------------|-------|------------|---|---------------|
| B1           | 1-1        | —     | —          | Ignition power failure (low voltage)  | →             |
|              | 1-2        | —     | —          | Ignition power failure (high voltage)   | →             |
| B3           | 3-1        | —     | —          | Back-up 1 failure (low voltage)   | →             |
|              | 3-2        | —     | —          | Back-up 1 failure (high voltage)  | →             |
| B11          | 11-1       | —     | —          | Headlight dimmer/passing light control switch failure (low voltage)               | →             |
|              | 11-2       | —     | —          | Headlight dimmer/passing light control switch failure (high voltage)              | →             |
| B12          | 12-1       | —     | —          | Turn signal switch failure (low voltage)  | →             |
|              | 12-2       | —     | —          | Turn signal switch failure (high voltage)   | →             |
| B17          | 17-1       | —     | —          | Horn switch/Favorite switch failure (low voltage)                                 | →             |
|              | 17-2       | —     | —          | Horn switch/Favorite switch failure (high voltage)                                | →             |
| B21          | 21-1       | —     | —          | Right front turn signal light failure (short circuit)                             | →             |
|              | 21-2       | —     | —          | Right front turn signal light failure (open circuit)                              | →             |
| B22          | 22-1       | —     | —          | Left front turn signal light failure (short circuit)                              | →             |
|              | 22-2       | —     | —          | Left front turn signal light failure (open circuit)                               | →             |
| B23          | 23-1       | —     | —          | Right rear turn signal light failure (short circuit)                              | →             |
|              | 23-2       | —     | —          | Right rear turn signal light failure (open circuit)                               | →             |
| B24          | 24-1       | —     | —          | Left rear turn signal light failure (short circuit)                               | →             |
|              | 24-2       | —     | —          | Left rear turn signal light failure (open circuit)                                | →             |
| B35          | 35-1       | —     | —          | Horn relay failure (short circuit)  | →             |
|              | 35-2       | —     | —          | Horn relay failure (open circuit)   | →             |
| B83          | 83-1       | —     | —          | Sel left switch/Back switch/Sel up switch/Sel down switch failure (short circuit) | →             |
|              | 83-2       | —     | —          | Sel left switch/Back switch/Sel up switch/Sel down switch failure (open circuit)  | →             |
| B91          | 101-2      | —     | —          | BCU EEPROM malfunction  | →             |
| B93          | 103-1      | U0001 | 103        | CAN communication malfunction   | →             |
|              | 103-2      |       |            |   |               |
|              | 103-3      |       |            |   |               |
