

## INSTALLATION

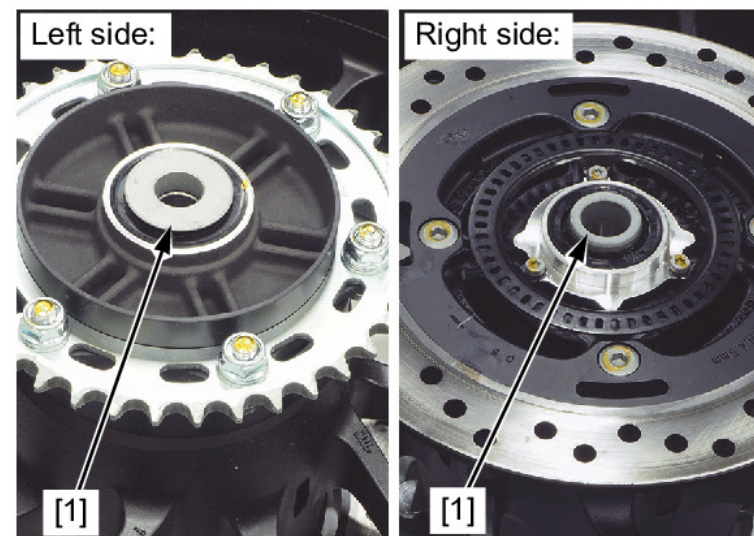

Install the rear brake caliper assembly [1] to the swingarm.

**NOTE:**

- Align the caliper bracket groove with swingarm guide.

Install the side collars [1].

Apply a thin coat of grease to the rear axle outer surface.

Install the rear wheel in the swingarm.

**NOTE:**

- Install the brake disc between the brake pads.
- Be careful not to damage the brake pads.

Install the drive chain [1] over the driven sprocket.

Install the left adjusting plate [2] and rear axle [3] from the left side.

Install the right adjusting plate [4], washer [5] and rear axle nut [6].

[Adjust the drive chain slack.](#)

[Check the clearance gap between the rear wheel speed sensor bracket and pulser ring.](#)
